

### **Specific Stipulations**

1. The operator is required to comply with all state and federal laws and regulations pertaining to, but not limited to, waste management, including domestic and industrial waste, water discharge, fish, game, and other material use, protection of cultural resources and values and reclamation. All wastes should be managed in accordance with State of Alaska and Federal laws and regulations. Pollution Prevention and Spill Response stipulations should be included with the Use Permit. Specifically, stipulations should address proper management requirements for waste water, hazardous and non-hazardous solid waste, and spill prevention and response. Suggested stipulations for Pollution Prevention and Spill Response are attached.
2. All trash and other debris will be removed from each drill site as each drill hole is completed.
3. Left over food, food scraps and food wrappings will be removed from the site each day to avoid attracting bears and other wildlife.
4. Helicopters will maintain an altitude of at least 1,500 feet traveling to and from the drill sites.
5. Helicopters will maintain a lateral distance of at least 1,500 feet from any wildlife concentrations, hunting camps and hunters in the field while traveling to and from the drill sites.
6. Exact GPS locations of all completed drill holes will be noted and provided to the BLM following completion of the project.
7. Individual or group latrines will require a hole to be dug and then covered with soil after each use.
8. The operator will immediately bring to the attention of the Authorized Officer any cultural and/or historic paleontological resources that might be altered or destroyed on Federal lands by his/her operations, and shall leave such discovery intact until told to proceed by the Authorized Officer.
